    - Developed and maintained a Ticketing Management Platform serving thousands of users.
    - Delivered scalable backend APIs for mobile and web applications.
    - Optimized complex queries, significantly improving system performance.
    - Integrated N8N automation workflows.
    - Worked with clients including SamaCares, MOT, MEWA, KKESH, and other major KSA organizations.
    -
- **PHP (Laravel) Developer**
  PiTechnologies — *Jan 2019 – Jan 2021*

    - ✓ Designed dashboards and REST APIs.
    - ✓ Improved code reusability by implementing modular architecture.

- **Outsource Web Developer**
  Seamlabs — *Feb 2019 – Mar 2021*

✓ Created custom dashboards and integrated payment gateways for eCommerce clients.

- **PHP Developer**
  Sahwaco — *Jan 2019 – Jan 2020*

    - ✓ Maintained and enhanced company's real estate management platform.

- **PHP Developer**
  Smart Touch Solution (STS) — *Jul 2017 – Jan 2019*

    - ✓ Developed eCommerce, portfolio, and company websites using PHP, Laravel, and WordPress.

Projects:

- ✓ Ticketing Management Platform – Hollat.net (Laravel backend)
- ✓ CRM for Azura Real Estate (Lead management & sales rotation)
- ✓ Dorra Group Database System & Dashboard (Multi-company/project management)
- ✓ WadiGroup Dashboard & Web Service (Mobile app events control)
- ✓ eCommerce Platforms (Clothes, Makeup & Perfumes)
- ✓ Real Estate Web & Mobile App Dashboard (User, property, and request management)
- ✓ Mobile App Dashboards for companies like Tather Digital & beauty.ms
- ✓ Company Websites & Portfolios (WordPress, PHP, MySQL)

AI Workflow Automation (n8n):

Developed and implemented intelligent workflows to automate business processes, Using AI tools.

Projects:

- **Telegram Business Card Scanner Bot** – Built an automation that extracts information from scanned business cards, stores it in Excel, and sends follow-up meeting invitation emails.

- **CRM AI Chatbot Assistant** – Designed a chatbot Form CRM system to help agents complete tasks faster and more efficiently.
- **AI-Powered Job Matching Workflow** – Automated collection of job postings from multiple websites, analyzed compatibility with user CVs, ranked top 3 matches, and generated AI-driven recommendations for applications.
- **Company Data Extraction Workflow** – Developed an AI workflow to gather real estate company details (name, email, phone) from Google Maps for specific locations, exporting structured data into Excel sheets.
- **AI WhatsApp Campaign System** – Built a workflow that sends personalized WhatsApp campaign messages to clients using data from Google Sheets, with message content dynamically generated by an AI agent.
- **RAG-based WhatsApp Support System** – Developed a Retrieval-Augmented Generation (RAG) system for companies to automatically respond to client WhatsApp messages with accurate, context-aware answers.
- **Multi-Clinic Registration and Analytics Platform** – Created a registration and management system for multiple clinics integrated with a Power BI dashboard for real-time performance tracking and insights.

Technologies Used: n8n, AI APIs (LLMs, OCR), Telegram API, Google Maps API, CRM Integration, Excel Automation, Email Automation.

Community Involvement:

- ✓ Vice President — Google Developer Group, 6 October City
- ✓ Volunteer — Insomnia Gaming Festival Egypt
- ✓ Founder — OTEX Student Activity
