SUMMARY

Principal Software Engineer and AI Systems Builder with 8+ years of experience in high-performance web applications, APIs, and enterprise dashboards. Skilled in end-to-end product engineering, database design, API integrations, and AI agent architecture. Author of open-source AI tools published on npm and Packagist. Strong background in eCommerce, SaaS, and internal tooling. Adept at leading projects from concept to deployment and collaborating with cross-functional teams.

EDUCATION

- Bachelor Degree of Computer Science — October 6 University (2014 – 2018)
  - Excellent at Graduation Project

SKILLS

1. Technical Skills

Backend: PHP, Laravel, Node.js, NestJS, Inertia.js, Filament, Multi-tenant Architecture, RESTful APIs, Unit Testing
AI & Agents: LLM Integration (OpenAI / Anthropic / OpenRouter), RAG Systems, Prompt Engineering, Agentic Loop Design, Tool/Skill Architectures
Frontend: HTML5, CSS3, JavaScript, Tailwind, React, Next.js
Database: MySQL, Firebase, Query Optimization
Tools & DevOps: Git
Automation: N8N Workflow Automation, API Integration, npm & Packagist publishing
CMS: Strapi

2. Language Skills

Arabic: Mother-tongue
English: Good

3. Soft Skills

- Fast-Learner · Teamwork · Responsibility · Cognitive Flexibility · Meets Deadlines · Researching

EXPERIENCE

Principal Software Engineer — Hollat

Oct 2025 – Present

- Leading architecture and technical direction for enterprise-level platforms.
- Overseeing backend scalability, API design, and system performance optimization.
- Mentoring engineering team and setting coding best practices.
- Driving automation and workflow improvements across projects.
- Designed and built Haiah, an internal AI assistant for Hollat using Laravel + Livewire, following a 6-pillar agentic architecture (LLM brain, memory, tool/skill system, chat connectors, proactive scheduler, agentic loop).

Senior PHP (Laravel) Developer — Hollat

Jan 2021 – Sep 2025

- Developed and maintained a Ticketing Management Platform serving thousands of users.
- Delivered scalable backend APIs for mobile and web applications.
- Optimized complex queries, significantly improving system performance.
- Integrated N8N automation workflows.
- Worked with clients including SamaCares, MOT, MEWA, KKESH, and other major KSA organizations.

PHP (Laravel) Developer — PiTechnologies

Jan 2019 – Jan 2021

- Designed dashboards and REST APIs.
- Improved code reusability by implementing modular architecture.

Outsource Web Developer — Seamlabs

Feb 2019 – Mar 2021

- Created custom dashboards and integrated payment gateways for eCommerce clients.

PHP Developer — Sahwaco

Jan 2019 – Jan 2020

- Maintained and enhanced company's real estate management platform.

PHP Developer — Smart Touch Solution (STS)
Jul 2017 – Jan 2019

- Developed eCommerce, portfolio, and company websites using PHP, Laravel, and WordPress.

PROJECTS

Hollat AI Services — AI Microservices Platform | NestJS + TypeScript

- Live AI microservices adding AI features to Hollat applications via a versioned REST API
- Modular NestJS design on a swappable LLM provider layer; Zod validation and API-key auth

Multi-Tenant Appointment Booking SaaS — Laravel 12 + Inertia/React

- Multi-tenant SaaS for government and enterprise appointment booking (Saudi/GCC market)
- Tenant-isolated booking engine with concurrency-safe slot locking (DB row-level locking)
- Citizen self-service via phone-OTP auth, with an SMS notification pipeline behind a swappable gateway
- Staff RBAC, approval workflows, and a Filament-based admin panel; 100+ automated tests

Ticketing Management Platform — Hollat.net

- Laravel backend with N8N integrations serving enterprise clients across KSA

Multi-Tenant SaaS eCommerce Platform — Laravel

- Laravel REST API backend managing online stores: products, orders, and subscription billing

Laravel Chores — Open-Source Packagist Package

- Batched, checkpointed, resumable data operations for Laravel — write only the per-record logic
- Safely processes millions of records (backfills, normalization, cleanup) with automatic resume after crashes or deploys
- Keyset pagination, per-record failure isolation, zero external dependencies (MySQL, PostgreSQL, SQLite)

packagist.org/packages/amrlotfy/laravel-chores · github.com/AmrLotfy/laravel-chores

Conan AI — Personal Open-Source Project | Node.js / npm

- Local-first Node.js CLI framework for building personal AI agents
- Supports OpenAI, Anthropic, and OpenRouter — model-agnostic by design
- Features: terminal REPL, Telegram bot, persistent memory (SQLite), proactive reminders daemon
- Extensible skill/tool registry with 5 published npm packages: weather, web search, news, file reader, Gmail

npmjs.com/package/conan-ai · github.com/AmrLotfy/Conan-ai

Haiah — Internal AI Assistant — Hollat | Laravel + Livewire

- Full-stack AI assistant built for internal company use (6-pillar agentic architecture)
- Integrates Gmail, Google Calendar, Google Drive, and Google Sheets
- RAG-based document Q&A, Telegram bot connector, web search, news & weather skills
- Proactive morning briefings, evening digests, reminders, and persistent long-term memory
- Stack: Laravel 11, Livewire, Tailwind CSS, OpenRouter API

Laravel AI Smart Reply — Open-Source Packagist Package

- CRM for Azura Real Estate (Lead management & sales rotation)
- Dorra Group Database System & Dashboard (Multi-company/project management)
- WadiGroup Dashboard & Web Service (Mobile app events control)
- eCommerce Platforms (Clothes, Makeup & Perfumes)
- Real Estate Web & Mobile App Dashboard (User, property, and request management)
- Mobile App Dashboards — Tather Digital & beauty.ms
- Company Websites & Portfolios (WordPress, PHP, MySQL)

packagist.org/packages/amrlotfy/laravel-ai-smart-reply

AI WORKFLOW AUTOMATION (N8N)

Developed and implemented intelligent workflows to automate business processes using AI tools:

- Telegram Business Card Scanner Bot — extracts info from scanned cards, stores to Excel, sends meeting invites.
- CRM AI Chatbot Assistant — helps agents complete CRM tasks faster.
- AI-Powered Job Matching Workflow — collects postings, ranks top 3 matches against user CV.
- Company Data Extraction Workflow — scrapes real estate data from Google Maps into Excel.
- AI WhatsApp Campaign System — sends AI-generated personalized messages from Google Sheets data.
- RAG-based WhatsApp Support System — context-aware auto-replies for client WhatsApp messages.
- Multi-Clinic Registration & Analytics Platform — integrated with Power BI for real-time insights.

Technologies: n8n, AI APIs (LLMs, OCR), Telegram API, Google Maps API, CRM Integration, Excel & Email Automation.

COMMUNITY INVOLVEMENT

- Vice President — Google Developer Group, 6 October City
- Volunteer — Insomnia Gaming Festival Egypt
- Founder — OTEX Student Activity
